

**OREGON OCEAN SALMON
EFFORT AND HARVEST
STATISTICS, 1979-1996**

Mark A. Vargas

OREGON DEPARTMENT OF FISH AND WILDLIFE
Ocean Salmon Management

Description of data

The information summarized in this report was collected by the Oregon Department of Fish and Wildlife, Ocean Salmon Management Program. Data for the commercial troll and recreational salmon fisheries were reported by statistical week (Monday through Sunday). The weekly data were aggregated to the monthly stratum based on a best fit calendar month within which the majority of the statistical week occurred.

Oregon data since 1979 are reported by eight major geographical catch areas:

Columbia River (from Leadbetter Point, WA. to Cape Falcon, OR.), includes the Oregon Ports of Astoria, Hammond and Warrenton;

Tillamook (from Cape Falcon, OR. to Cascade Head, OR.), includes the Oregon Ports from Garibaldi and Pacific City;

Newport (from Cascade Head, OR. to Heceta Head, OR.), includes the Oregon Ports from Depoe Bay and Newport;

Coos Bay (from Cape Heceta Head, OR. to Humbug Mountain, OR.). The southern Boundary has migrated from Cape Blanco to the Orford Reef Buoy (1988) to Humbug Mountain (1990), and includes the Oregon Ports from Florence, Winchester Bay, Coos Bay, Bandon, and starting in 1988, Port Orford;

Brookings (from Humbug Mountain, OR. to Point St. George, California). The northern boundary has migrated from Cape Blanco to the Orford Reef Buoy (1988) to Humbug Mountain (1990), and includes the Oregon Ports of Gold Beach, Brookings, and through 1987, Port Orford;

Alaska (caught off Alaska and landed in Oregon);

Washington (caught north of Leadbetter Point, WA. and landed in Oregon) and;

California (caught off California and landed in Oregon).

Recreational fishery effort and landings are sampled only in the following major ports: Astoria, Garibaldi, Pacific City (since 1981), Depoe Bay, Newport, Florence (since 1981), Winchester Bay, Coos Bay, Gold Beach (until 1988), and Brookings. Non-surveyed ports and time periods are not represented in this data set. It is estimated by Oregon Department of Fish and Wildlife these non-surveyed time and areas usually represent less than one percent of the harvest.

Pink salmon landings are only presented in this report from the commercial troll fishery during odd numbered years, pink salmon landings from the commercial troll salmon fishery during even numbered years are negligible and are not listed in this report. Pink salmon landings in the Oregon recreational fishery are negligible and are not presented in this report. Occasional harvest of chum salmon, sockeye salmon, and steelhead occur off Oregon in both the commercial and recreational salmon fisheries, but are considered very negligible and are not presented in this report.
