

Fish Commission of Oregon  
 Groundfish and Shrimp Investigations  
 Report of Cruise 74-11, Shrimp

- Vessel:** M/V Ms. Dana, Chartered trawler
- Dates:** September 5-13, 1974
- Objectives:**
1. To determine the biomass and number of shrimp (*Pandalus Jordani*) within the two survey areas between the Astoria Canyon (Columbia River) and Yaquina Head.
  2. To determine age and sex composition of stocks as well as average size (number/pound) and length frequency.
  3. To compare the FCO survey trawl net with a commercial shrimp trawl net.
- Methods:** The MV Ms. Dana is a steel Gulf-style shrimp trawler, built in Newport in 1973-74, 55 feet overall length and 44 gross tons. She is powered by a 275-hp diesel engine. The vessel supplied a 57-foot (headrope) Marinovitch semi-balloon trawl having mesh size of 1½ inches and tickler chain. We supplied a 41-52 foot (headrope - footrope) shrimp trawl (1 1/8 inch mesh except for a 1½-inch codend with a ½-inch bobinette innerliner).
- We selected 28 sampling stations in the North area (Columbia River to Tillamook Bay); 24 sampling stations in the north-central area (Tillamook Bay to Yaquina Head), based on a systemic sampling plan using 4.0x4.0 nautical mile - square grids. Tows were approximately one nautical mile long. We recorded Loran (IL0) and depth (fathoms) at start and end of each tow, as well as time and ocean - weather conditions.
- We sorted the catch of each net each tow and estimated the number and weight of major non-shrimp species in the catch. The shrimp catch was weighed and recorded to the nearest pound for each net each tow. A randomly drawn 2-5 pound sample was retained and taken ashore for analysis. Samples were frozen ashore pending analysis.
- Results:** Twenty-eight and twenty-four stations were occupied towing both nets in the north and north-central areas, respectively. Shrimp were caught in 23 of 28 stations (commercial) and 24 of 28 stations (FCO trawl) in the north area. Catch/net/tow ranged from 0-256 pounds. Table 1 summarizes unweighted catch data:
- |                     | Commercial Trawl     |     |     | FCO Trawl   |       |       |
|---------------------|----------------------|-----|-----|-------------|-------|-------|
|                     | Mean catch/tow, lbs. | 49  | 72  | Range, lbs. | 0-172 | 0-256 |
| Age composition (%) | age                  | N   | Wt. |             | N     | Wt.   |
|                     | 1                    | 51  | 31  |             | 56    | 35    |
|                     | 2                    | 34  | 42  |             | 30    | 39    |
|                     | 3+                   | 15  | 27  |             | 14    | 26    |
| Average Size (N/Lb) |                      | 119 |     |             | 123   |       |

Shrimp were caught in 20 of 24 stations (commercial) and 21 of 24 stations (FCO trawl) in the north-central area. Catch/net/tow ranged from 0-552 pounds. Table 2 summarizes unweighted catch data:

Table 2. North-Central Area Catch and Composition Summary

		Commercial Trawl		FCO Trawl	
Mean catch/tow, lbs.		70		84	
Range, lbs.		0-485		0-552	
Age Composition (%)	age	N	Wt.	N	Wt.
	1	66	45	70	50
	2	19	28	19	28
	3+	15	27	11	22
Average Size (N/Lb)		126		133	

In general, the FCO trawl outfished the commercial trawl in both areas. It also retained slightly more age-1 shrimp, less age-3+ shrimp.

Table 3 summarizes the cruise log.

Personnel: Edwin Niska, Party Chief 9/5 - 8/74  
William Barss, Party Chief 9/11 - 13/74  
George McMurrick, Jr., Vessel Captain  
Michael Main, Crewman  
Mimi McMath, Crewwoman
