INTRODUCTION

The Ocean Salmon Management Program (OSMP) monitors ocean commercial and recreational salmon fisheries, coordinates Oregon coastal salmon spawning surveys, and conducts ocean and coastal river's investigations for the Oregon Department of Fish and Wildlife (ODFW). The program uses data from these and other sources to develop management strategies to effectively manage Oregon's salmon resources, and to evaluate proposed ocean salmon fishery regulations. Major forums in which OSMP staff participate include the Pacific Fishery Management Council (PFMC) and its salmon technical teams (STT and SSC), the Pacific Salmon Commission (PSC) and their technical committees, and the Klamath Fishery Management Council (KFMC).

The OSMP fulfills Oregon's technical and management responsibilities to these management entities as directed under the U.S./Canada Salmon Interception Treaty (1986), the Magnuson Fishery Conservation and Management Act (MFCMA) PL 94-265 (1976), and the Anadromous Fisheries Act 89-304.

This report summarizes the activities of OSMP's Ocean Salmon Sampling Project for the 1996 ocean season. In 1996, we collected and analyzed data on Oregon's catch and fishing effort, recovered coded wire tags (CWTs), and gathered average weight data from commercial salmon landings. We also collected chinook salmon scales for aging. During 1996, we conducted an extensive creel of the Tillamook Bay coastal estuary and nearshore ocean fall chinook fisheries. We collected tissue samples from chinook for genetic stock analysis of a troll fishery near Gold Beach.

The OSMP sampling project is permanently staffed by a project leader and an assistant project leader at Newport, and two seasonal sampling coordinators; one each at Tillamook and Charleston. The sampling coordinators serve as liaison between field samplers, fishery participants, and program staff at Newport; deliver data and coded wire tags to Newport; and also provide additional sampling when needed.

The Oregon Coast has twelve substantial ocean ports or access points to the ocean salmon fishery. In 1996, we sampled nine of the primary Oregon coastal ports, utilizing seventeen seasonal samplers: four were commercial troll samplers, seven were recreational samplers, and six were "combination" commercial-recreational samplers. Several additional samplers were picked up on loan from other projects or were hired for very short periods (Appendix Table 1). One additional employee helped edit and process field sampling data under the direction of OSMP's Data Management Project.

1996 OCEAN TROLL SALMON FISHERY

BACKGROUND

The commercial salmon troll fishery was developing off the Oregon Coast by the year 1912 (Mullen, 1981). By 1919, there were between one and two thousand boats trolling off the mouth of the Columbia River. The State of Oregon began recording troll landings separately from gillnet fisheries in 1925.

Landings of ocean troll caught coho salmon remained relatively stable from 1925 to 1941, with landings between 2,000,000 and 4,000,000 pounds (dressed weight: head-on, viscera removed) for most years (Figure 1). From 1942 to 1950 catches remained near 1,000,000 pounds annually, but by 1957 landings had climbed back up to 3,400,000 pounds. The El Niño of 1958-59 resulted in landings dropping back below 1,000,000 pounds or 200,000 fish. During the 1960s and early 1970s, improved hatchery production and rearing techniques, a growing troll fleet, and good ocean survival rates of smolts to adults resulted in record landings that peaked in 1976 with 1,800,000 coho landed. From the mid 1970s and continuing into the 1990s, Oregon's ocean coho fishery has been characterized by continuing poor ocean environmental conditions and poor overall survival, increasing management restrictions, and reduced ocean harvest opportunities.

Although chinook harvest by the troll fishery has also seen dramatic fluctuations, the long term trend has been one of increasing landings. The troll chinook fishery had record harvests in 1987 and 1988. The late 1980s and early 1990s have seen a decline in harvest due to decreases in many stocks, concern for critical natural stocks under both state and federal management and the federal Endangered Species Act (ESA), along with increasing allocation conflicts between river and ocean user groups.

Historically, coho salmon predominated in the landings, but for the last decade chinook landings have equaled coho, and in many years made up the majority of the catch. This is primarily due to lower coho survival rates and much higher chinook survival rates and catch in the late 1980s (Figure 1, Table 1). Chinook will continue to predominate in the landings until coho abundance increases enough to allow fisheries to resume.

Entry into the troll fishery was unrestricted until 1980 when a permit moratorium was adopted. Although 4,311 vessels already had Oregon troll permits, a goal of 2,400 vessels licensed to troll for salmon in Oregon was established. The Oregon legislature lowered the troll permit ceiling to 1,800 vessels in 1993. Following recommendations of an industry panel that reviewed the troll permit limited entry status, the 1995 legislature lowered the permit cap further to 1,200. In 1996, the number of renewed troll permits declined to 1,377. Of the permitted vessels, only 456 recorded landings of salmon in 1996. Ocean troll coho salmon fishing was prohibited in 1996. All commercial troll salmon fishing was closed completely in Oregon waters north of Cape Falcon due to

Table 1. Oregon commercial troll salmon effort (deliveries and boat days) and landings (number of fish and pounds dressed), 1952-96. Includes effort and catches made off California, Washington, and Alaska and landed in Oregon.

^a Numbers of pink salmon from 1952-78 are estimated by dividing the pounds landed by the 1979-94 average weight of pink salmon landed in Oregon from 1979-94 (5.403 lbs/per pink salmon).

^b Pounds dressed for pink salmon for the period of 1952-78 is back calculated from round weights landed by dividing total pounds by the standard conversion factor of 1.15. Poundages from this period may also include landings of pinks from other commercial fisheries.

FISH (thousands)

POUNDS DRESSED (thousands)

Figure 1. Historical Oregon troll salmon landings in numbers of fish (1952-96), and in pounds dressed, head on viscera removed (1925-96).

concerns for regional wild coho stocks and for chinook stocks listed under the Endangered Species Act. July was closed in the area from Cape Falcon to Humbug Mountain to reduce incidental hooking mortality impacts on wild coho salmon. The area south of Humbug Mountain saw limited troll chinook salmon opportunities in 1996 (Figure 2).

SAMPLING METHODOLOGY

Sampling Areas and Staffing

For 1996, a seasonal staff of four troll salmon samplers and six combination (troll/recreational) samplers were deployed at Oregon coastal ports (Appendix Tables 1 and 2). Samplers worked at both permanent and temporary buying stations in Garibaldi, Newport, Florence, Winchester Bay, Charleston, Gold Beach, Port Orford, and Brookings. Troll sampling was supplemented at times by permanent staff.

Sampling Design

Sampling is conducted via an established sampling plan using a stratified random design. Samplers are instructed to sample proportionate landings from trip boats and day boats, from landings throughout the week, and from all major buyers. Sampling data is recorded in the field on handheld data entry computers with software designed for the collection of the necessary field data. Handheld data is then transferred weekly to the Newport office and downloaded to a computer for summarization and analysis. All individual landings are kept confidential.

Average Weights and Coded Wire Tags

Salmon are sorted and weighed by fish plant personnel. Simultaneously, OSMP employees tally fish by species and grade, record corresponding total weights, and examine the salmon for clipped adipose fins. A clipped adipose fin indicates that the fish has a coded wire tag (CWT) implanted in its snout.

Quota Assessment

The PFMC area ocean salmon harvests are managed to achieve specific spawning escapement goals for regional salmon stocks as adopted by the PFMC, provide for in-river fisheries, and Native American treaty requirements. Quotas or harvest ceilings for specific time and area fisheries are a primary tool of harvest management. Quotas are set based on estimates of adult recruitment, stock contribution and distribution, anticipated ocean harvest patterns, impacts on critical stocks, and spawning escapement goals.

A fish receiving ticket is required for each troll salmon landing. Estimates of the number of salmon landed are derived by taking poundages from fish receiving tickets and applying average weight data from port sampling. Intensive ocean troll fisheries and

Figure 2. Commercial ocean troll seasons off Oregon, 1996.

quotas make it necessary for managers to be able to monitor catches timely and with reasonable accuracy. Standard processing of fish ticket data may take more than three weeks, and cannot be effectively used for in-season quota management.

To overcome the fish ticket time lag, the OSMP developed a commercial troll fishery "key buyer" program in 1983. This program monitors daily or periodic troll landings at major ("key") buyers along the coast as needed to provide assessment of landings under quota managed fisheries. Sampling staff contact major salmon buyers in each port and summarize total pounds of salmon purchased for a specific time period and fishery. The sampler then contacts OSMP staff at the Newport office with the poundages and the summarized sample data for the same period. Total poundages landed at key buyers are expanded to account for the buyers who were not contacted. By dividing the estimated poundage of salmon landed within a given port by the average weight from the sampling data for that port, a reasonable estimate of the landings can be made within 24 hours. Key buyers typically represent more than 90% of the landings and allow for expansion of the landings with minimal error.

Estimates are also made for fish "on the water", and buyer percentages are adjusted in season to reflect current delivery patterns. As "hard data" from the fish ticket system becomes available, it is used to replace the early key buyer "soft data". Assessment of fish on the water becomes less precise as the level of trip boat participation increases, and can be complicated by buyer boats, out of area landings, and mobile buying stations.

REGULATIONS

Ocean salmon regulations are set by the PFMF for all ocean salmon fisheries in the Exclusive Economic Zone (EEZ) from 3 to 200 miles. For state waters (0 to 3 miles), ocean salmon regulations are set by the Oregon Fish and Wildlife Commission (OFWC) within the ocean salmon harvest impact guidelines established by the PFMF. Special all-species-except-coho fisheries are set by the OFWC for state waters within 3 miles of shore.

All 1996, Oregon and PFMF area ocean troll salmon fisheries were restricted to gear containing single point, single shank barbless hooks, and not more than four terminal gear spreads per wire. Minimum length restrictions were 26 inches total length for chinook caught south of Cape Falcon (Figure 2, Appendix Table 3).

Cape Falcon to Cape Arago

The all-salmon-except-coho fishery from Cape Falcon to Cape Arago was open from May 1 through June 30 and August 7 through October 31 (147 fishing days). There were no chinook quota restrictions in this area. A control zone (Appendix Figure 1) was established off the mouth of Tillamook Bay and was closed in June to limit catch on locally depressed stocks of spring chinook, and closed August 7 through September 15 to reduce incidental hooking mortality on coho (Appendix Figure 1).

Cape Arago to Oregon - California Border

The all-salmon-except-coho season from Cape Arago to the Oregon - California border was open May 1 through earlier of June 30 or 5,300 chinook quota. Season was scheduled to follow a cycle of 4 days open/3 days closed. The season followed the 4 day open/3 day closed cycle until May 18 when it opened to seven days per week and then closed at noon on June 4 due to attainment of the quota (29 fishing days). Note that a communication problem between fishers and the Coast Guard and National Marine Fisheries Service (NMFS) resulted in several boats continuing to fish after the closure. NMFS failed to broadcast the "Notice to Mariners" closure notification until 4:33 PM on June 5.

Cape Arago to Humbug Mountain

The all-salmon-except-coho season from Cape Arago to Humbug Mountain was open August 7 through August 31, and September 1 through October 31 (86 fishing days). Subarea chinook quotas were adopted for both time periods: the first quota for the period August 7 through August 31 allowed a catch of 8,800 chinook, and the second quota of 10,000 chinook was set for September 1 through October 31. Neither quota was met, and the seasons continued to their scheduled closing dates with no inseason adjustments.

An all-salmon-except-coho season was authorized by the OFWC for state waters (0-3 miles) for the area off the Elk River, from Cape Blanco to Humbug Mountain. This fishery was scheduled for November 1 - 30 with no chinook quota. The season opened November 1 and continued through it's scheduled closing date of November 30 (30 fishing days). All chinook were required to be landed into Port Orford.

Humbug Mountain to Horse Mountain

An all-salmon-except-coho season opened August 3 through the earlier of August 31 or 3,000 chinook quota for waters from Sisters Rock to Mack Arch (0-4 miles). This fishery was scheduled on a cycle of two days open and two days closed but opened to 7 days per week on August 15. The season was open August 3-4, 7-8, 11-12, 15-31. Vessels were required to land and deliver their fish at either Port Orford, Gold Beach or Brookings within 24 hours of each closure (23 fishing days).

A chinook-only season was authorized by the Oregon Fish and Wildlife Commission for state waters (0-3 miles) for the area from Goat Island to 42° 01' 20" N. Lat. This fishery was scheduled to open October 14 and continue through October 31 or the quota of 1,000 chinook. A single daily landing limit of 20 fish was in effect to keep the fishery manageable. The season opened October 14 and continued through October 31. All chinook were required to be landed into Brookings (18 fishing days).

EFFORT AND CATCH STATISTICS

Landed poundage, dollar value, area of catch, and days fished were obtained directly from Oregon's commercial fish receiving tickets. Pounds landed were converted to number of fish by using average weight information collected by port samplers. Prior to 1979, all Oregon troll catch statistics were reported by port of landing. Beginning in 1979, catch and effort estimates have also been reported by ocean catch area (Figure 3). Landings are allocated to correct catch areas to properly assess ocean fishery impacts. Area of catch data are recorded on fish tickets by buyers and are cross-checked with available OSMP sampling data.

Effort

Historically, Oregon's troll effort has been estimated in vessel deliveries and, since 1979, in boat days. Troll effort for 1996 totaled 8,500 boat days. This is 6% higher than the 1995 effort of 7,900 boat days, but only 31% of the 1979-95 average of 26,800 boat days. The 1996 effort was only 16% of the record 51,100 days observed in 1988 (Table 1). The increase in troll effort in 1996 was due to a number of factors including: good chinook catches especially in the Newport ocean catch area, and an increase from 1995 in days open for fishing from Cape Falcon to Cape Arago.

Most 1996 effort (57%) occurred within the Newport catch area, but effort was up in all fishery areas, except the Columbia River catch area due to a complete troll salmon fishery closure (Figure 4, and Appendix Tables 4 and 5).

Historically, peak effort levels have occurred during the general coho season in July and August. Most of the 1996 troll effort occurred in June and August, and coincided with the chinook openings from Cape Falcon to Humbug Mountain.

Landings

Chinook: The 1996 troll chinook landings totaled 177,200 fish including 2,000 chinook caught in California and landed in Oregon. The landings declined 18% from the 1995 catch of 214,900 chinook, and equaled 81% of the 1979-95 average of 217,900 chinook (Table 1; and Appendix Tables 4 and 6). Total landings in pounds of dressed chinook (head on, gills and viscera removed) was 1,925,000 lbs, and was within 1% of the 1995 chinook landings.

Most chinook were caught in the Newport catch area (72%), although total landings in this area declined 26% from the 1995 catch. Catches were up from 1995 in the Tillamook and Brookings catch areas, but down in all other catch areas. The increase in chinook catch in the Brookings catch area was a result of more time and area fishing

Figure 3. Oregon salmon catch areas and major ports of landing.

Effort

BOAT DAYS (thousands)

Figure 4. Oregon commercial ocean troll salmon effort in boat days by area of catch and by month, 1994-96.

opportunities (including a state waters fishery), and were not necessarily a result of changes in chinook abundance (Figure 5). July is typically the month of greatest chinook landings. However, a general statewide closure during July resulted in August making up 35%, June 26%, September 17% and May 12% of the chinook catch (Table 3).

AVERAGE WEIGHT DATA

Average ocean troll salmon weight data is collected from most ports by OSMP port samplers and allows for conversion of fish ticket poundage information to numbers of fish. The 1996 seasonal average dressed weight (head on, viscera removed) for chinook was 10.9 pounds (Table 3). This was 20% higher than the 1995 average weight of 9.0 pounds. The 1996 average weights were higher in every month when compared to the 1995 weights.

THE DOLLAR VALUE OF OCEAN SALMON LANDINGS

The 1996 Oregon troll chinook landings had an ex-vessel value of \$3,007,000. This was almost 9% lower than the ex-vessel value in 1995, and was only 68% of the 1971-95 average of \$4,452,000. The average price of \$1.56 per pound was down 8% from the 1995 average price of \$1.69 per pound and was the lowest price paid since 1975 (dollar values are not adjusted for inflation) (Appendix Table 7).

CODED WIRE TAG SAMPLING

In 1996, the troll sampling program examined 63,548 of all landed chinook (36%) for CWTs (Table 4), of which 5.5% or 3,474 chinook were marked (adipose fin clipped). Technicians recovered readable tags from 2,981 snouts (86%). Most of the CWTs recovered were released by California Department of Fish and Game (40%), and ODFW (44%). Most of the recovered CWTs were released in California's Sacramento/ San Joaquin Basin (45%), Oregon coastal streams (35%), the Klamath River Basin in California (3%), and the Columbia Basin (9%) (Figure 6). It should be noted that 615 of the CWTs (21%) were recovered from the terminal area fishery off the Elk River in October and November (see next section), and that these recoveries account for 46% of the total ODFW tags and 58% of the Oregon coastal stream CWT recoveries although they only account for 2% of the chinook sampled and 1% of the Oregon troll chinook landed.

SPECIAL FISHERIES AND STUDIES

Elk River State Waters Chinook Fishery

A terminal ocean troll fishery designed to target returning Elk River fall chinook salmon opened immediately following the end of the general season. This fishery was open from November 1-30 within state waters (0-3 miles) in the area between Cape Blanco and Humbug Mountain. This fishery immediately followed the general ocean season, but in recent years the Port Orford troll fleet has almost exclusively limited themselves to fishing the same area as the terminal fishery during the month of October.

A total of 997 chinook were landed during the month of November averaging 13.4 pounds. In the October portion of the general season just prior to the state waters fishery, an additional 1,158 chinook were landed. During the October thru November fishery, there were 663 snouts collected from the 1,299 chinook that were examined for fin clips (51% mark rate). There were a total of 615 readable tags. A total of 609 (99%) of the CWTs were from Elk River chinook releases. Of the Elk River CWTs recovered, 324 were three year olds (1993 brood), 239 four year olds (1992 brood), 44 five year olds (1991 brood), and 2 were six year olds (1990 brood). The CWTs from non-Elk River releases included: One four year old Hunter Cr. fall chinook release that was reared at Elk River Hatchery, one four year old Pistol River fall chinook release that was reared at Elk River Hatchery, two three year old Sacramento River (California) fall chinook, one three year old Klamath River (California) fall chinook, and one four year old Deschutes River spring chinook.

Rogue River Fall Chinook Genetic Stock Identification Study

Introduction: The PFMC authorized an experimental August ocean troll chinook fishery in waters near the Rogue River on the southern Oregon Coast. This fishery was designed to test whether a nearshore troll fishery could target returning Rogue River fall

Release Agency

Basin of Release

Note: Does not represent stock contribution rates since tagging is not representative of all stocks.

Figure 6. Observed recoveries of chinook coded wire tags from Oregon commercial ocean troll salmon landings by release agency and by basin of release, 1996. N=2,981

chinook and reduce harvest impacts on other critical stocks (i.e., Klamath River fall chinook). The test involved the collection of tissue samples to allow for the post season estimation of the stock composition through genetic stock identification (GSI) analysis. The 1996 study was made possible through federal NW salmon disaster relief funding.

The GSI process relies on genetic differences between stocks or stock groups of salmon that can be measured using starch gel electrophoretic techniques. The test fishery was scheduled to open August 3 and continue through the earlier of August 31 or the 3,000 chinook quota. The open area included waters from 0-4 miles between Sisters Rocks and Mack Arch, except that the area within a one mile radius of the Rogue River remained closed to all commercial salmon fishing due to state statute. The GSI sampling required a minimum sample size of 400 fish to accurately estimate stocks with low contribution rates to the fishery. To insure that ODFW could adequately sample the fishery, all salmon were required to be landed into either Port Orford, Gold Beach, or Brookings. Pre-registration was required for the fishery in 1996 and only 118 vessel landings occurred during the fishery.

Results: A total of 2,636 chinook were landed in the GSI test fishery by participating trollers. The ODFW staff collected GSI tissue samples from 626 of the landed chinook. The sampling goal was met and samples analyzed by a contract laboratory. Results are presented in Figure 7 and Table 6.

Most of the chinook sampled came from California stocks (92%). The Sacramento/San Joaquin system showed as the highest contributing stock group at 69%, the Klamath River made up 18%, and the southern Oregon/Rogue River stocks making up only 2% of the chinook sampled. The remainder was made up of California coastal/Eel River, upper Columbia and Snake River fall, Smith River, northern Oregon coast, and lower Columbia fall chinook stocks.

Twenty-five chinook recovered for analysis had adipose fin clips that indicated a presence of CWTs. Thirteen of the chinook CWTs were from Sacramento fall chinook, three were Klamath, three were Rogue, two were Columbia, and the remaining four had no tags present.

Discussion and conclusion: This fishery demonstrated little potential to target on returning Rogue River fall chinook in 1996. Only in 1994, during an earlier test fishery, were there any indications that the fishery was able to catch Rogue chinook at a higher rate than a general season in the area. The fishery may improve its ability to target Rogue chinook with a restructuring of the open times and/or areas to better match the run return timing of the Rogue River fall chinook.

Chetco River State Waters Chinook Fishery

A late season ocean terminal troll fishery designed to target on returning Chetco River fall chinook opened on October 14 and continued through October 31, 1996. This fishery was open within state waters (0-3 miles) in the area between Goat Island and 42° 01'20" N. Lat. and had a quota of 1,000 chinook.

A total of 788 chinook were landed averaging 15.6 pounds (Table 5). There were 29 snouts taken from adipose fin-clipped chinook of which 26 readable CWTs were recovered (90%). Chetco River releases accounted for 11 of the CWTs; 4 were from the Winchuck River; 4 from Pistol River; 2 from Hunter Creek, 1 from Elk River, and 4 from the Sacramento Basin in California. Of the Chetco River CWTs, 3 were three year olds (1993 brood), 7 were four year olds (1992 brood), and 1 was a five year old (1991 brood). This information does not represent stock composition percentages as CWT marking rates and fishery sampling rates are not accounted for.

THE 1996 OCEAN RECREATIONAL SALMON FISHERY

BACKGROUND

Oregon's ocean recreational salmon fishery originated with boats fishing in the bays on mature salmon returning to freshwater in the fall. A few boats would venture out into the ocean on favorable days. The late 1940s and early 1950s marked the beginning of increasing effort by both the charter and private boat fleet in the ocean. Better and safer equipment plus the development of small boat basins and launching ramps and other support facilities in many coastal towns encouraged ocean fishing (PFMC, 1978).

The primary targeted species of the Oregon recreational fleet has traditionally been coho salmon with chinook a distant second. The fishery has been sampled by ODFW's Ocean Salmon Management Program since the early 1960s. Ocean creel data was supplemented by salmon/steelhead tag license data through the 1980 season. Creel data alone have been used since 1981.

The peak catch and effort year was 1976 when 538,400 angler trips resulted in a catch of 79,300 chinook and 501,300 coho. The daily bag limit in 1976 was 3 salmon and the season lasted from April 10 to December 31. In 1996, the seasons and catch quotas were very limited; and resulted in an ocean catch of 11,210 chinook and 7,176 coho from 43,962 salmon angler trips (Table 7). Oregon's ocean recreational fishery has generally been limited to chinook salmon beginning with the 1994 ocean season when most ocean coho salmon fishing was prohibited.

SAMPLING METHODOLOGY

Sampling areas and staffing

Fourteen seasonal employees sampled the ocean recreational fishery at nine coastal ports in 1996 (Appendix Table 1). In Astoria/Warrenton we transferred other samplers on temporary assignment to sample the fishery.

Limited sampling began in May in most ports. Some of the early sampling was supported by other funds such as ocean sport halibut license moneys to assist monitoring of the concurrent halibut season. Additional personnel were added to cover late season terminal ocean area state waters salmon fisheries at Garibaldi and Brookings during September and October. All samplers counted ocean boats and checked returning anglers (Appendix Table 8).

Sampling Design

A statistical recreational creel survey using a modified random sampling design has been used in all recent years. Ocean anglers are interviewed at boat ramps, moorages,

Table 7. Oregon ocean recreational salmon catch and effort for 1966-96^a.

Year	Effort (Angler Trips)		Salmon Catch			Fish/Angler

^a Prior to 1981, sampling data were supplemented with salmon/steelhead tag data for ports and time periods not sampled.

^b Odd year average.

charter docks to determine average number of anglers per boat, trip type, average length of trip, and catch rate by species. Samplers usually work from early morning to late afternoon, but work hours vary to reflect fishing activity. The salmon catch is sampled for species, fin marks, scales and lengths. Snouts are collected from marked (adipose fin-clipped) fish and forwarded to the ODFW tag recovery laboratory in Clackamas for decoding. Bottomfish catch is also recorded. In 1996, all OSMP ocean recreational sampling data was collected with hand held data collection computers. Data was collected weekly and transported to the Newport ODFW office for error checking and analysis.

Estimates of private boat effort is primarily obtained through boat counts by ODFW samplers, but Coast Guard bar crossing counts are used in Florence and occasionally at other locations. In Astoria, Newport, Winchester Bay, Coos Bay, and Brookings ODFW boat counters monitor bar crossings beginning at dawn (usually starting at 5:00 AM) and continuing until 10:00 AM, and then sample for the remainder of their shift. An expansion factor based on full boat counts from several previous years is applied by OSM staff to account for boats going out after 10:00 AM. Similar bar crossing counts are made at Garibaldi, but these counts are made from dawn until 11:00 AM to account for the often later rush of boats at the turn of the tide in Garibaldi. In Pacific City and Depoe Bay, total effort is estimated from a combination of boat trailer and moorage slip counts and a tally of outgoing vessels during the sampling period (usually 8:00 AM until 4:00 PM). Counts are averaged using adjacent days of the same type (i.e. weekday vs weekend/holiday) with similar weather/ocean conditions for days when no bar crossing counts were available.

Although charter vessels are counted separately in the bar crossings by the samplers, these counts are typically only used for charter effort at Astoria/Warrenton. In all other ports, charter effort estimates are made by contacting individual charter offices to determine the number of charter boat trips by trip type (i.e. salmon, bottomfish, combination salmon/bottomfish, halibut, or tuna) for each day.

Quota Assessment

Catch and effort data are error-checked and then processed on the Department's Unisys computer (Portland) by Newport OSMP data staff. Angler interviews are stratified by charter and private boat angler to provide average catch rates by species for each boat type (i.e. charter and private). These catch rates, when multiplied by total effort for a particular period, give a catch estimate for that period. The same method is used to estimate total angler trips. The survey provides weekly estimates of Oregon's ocean recreational effort and catch within 4 days after the week ended. A preliminary catch estimate is available within one day of the end of the week. These catch estimates are necessary for timely monitoring of fishery catch quotas.

Department samplers checked 6,593 salmon in 1996 compared to 6,341 in 1995. Catch sampling rates in 1996 ranged from a high of 72% at Depoe Bay, to a low of 33% at Brookings. Samplers checked 36% of the total salmon catch from all ports in 1996 compared to 34% in 1995 (Appendix Table 8).

REGULATIONS

General

The Oregon Coast is divided into three general salmon management areas: north of Cape Falcon, Cape Falcon to Humbug Mountain, and south of Humbug Mountain. The 1996 regulations (Figure 8) were adopted by the PFMC and signed into law by the Secretary of Commerce. The OFWC adopted the regulations as written by the PFMC for state waters (0-3 miles) and adopted three additional special seasons in state waters. Appendix Table 9 summarizes the history of Oregon's recreational ocean salmon regulations.

North of Cape Falcon

An all-salmon-except-chinook season was adopted for the area from Leadbetter Point, Washington to Cape Falcon, Oregon to open July 22 and continue through September 26 or the quota of 28,100 coho. The season opened on July 22 and continued through September 26. This season was closed within 3 miles of shore to the north of the Columbia River, and open Sunday through Thursday only. The bag limit was 2 salmon per day, but not more than 4 in 7 days. The minimum size limit for coho was 16", but no minimum size was required for pink salmon. A quota of 28,100 coho was set. Three thousand coho were added in season to this quota due to savings in the Washington coastal fisheries, and brought the total quota to 31,100 coho. The Columbia River control zone was closed to salmon angling.

Cape Falcon to Humbug Mountain

The daily bag limit was 2 salmon, not more than 6 fish allowed in 7 consecutive days, and the annual limit was 40 salmon. Minimum size limits were 20" for chinook and there was no size restriction for pink salmon. Special gear restrictions were in effect which included artificial plugs or whole bait, both 6" or larger; no more than two single point, single shank barbless hooks; and no flashers or divers were allowed. The general season was open May 1 through July 7 and August 16 through September 30. There were no quotas in this area.

A control zone was established around the mouth of Tillamook Bay (Appendix Figure 1) to provide added protection for local salmon stocks of concern. OSMP staff erected US Coast Guard approved markers at the northern and southern boundaries of the zone. The control zone was closed June 1 through September 15 to reduce the impact on local spring chinook and coho.

Figure 8. Ocean recreational salmon seasons off Oregon, 1996.

Humbug Mountain to Horse Mountain, California

The first season in the area from Humbug Mountain, Oregon to Horse Mountain, California was scheduled to be open from May 12 through July 7. This area is referred to as the Klamath Management Zone (KMZ). This fishery was 7 days per week with a bag limit of 1 salmon per day no more than 4 in 7 consecutive days.

The next season was open from August 18 through September 21. This fishery was open 7 days per week with a bag limit of 1 salmon per day no more than 4 in 7 consecutive days.

Oregon had an annual bag limit of 40 salmon. The minimum size limit for chinook was 20", there was no size restriction for pink salmon, and the area was closed to coho salmon retention. No more than 2 single point, single shank, barbless hooks were allowed.

Late season, state waters fisheries

October Fishery off Tillamook Bay: The Oregon Fish and Wildlife Commission set a state waters (0-3 miles) season for all-salmon-except-coho off Tillamook Bay between Twin Rocks and Pyramid Rock. The open period was October 1 through 31. Special gear restrictions went into effect which included: Artificial plugs or whole or plug-cut bait, both 6" or larger. No more than two single point, single shank barbless hooks; no flashers or divers. A bag limit of two salmon per day, and not more than six salmon in seven consecutive days was in effect. No quota was in effect during this season.

October/November Fishery off Port Orford: This state waters (0-3 miles) all-salmon-except-coho fishery extended from Cape Blanco south to Humbug Mountain and had no quota. The area was open to both commercial and recreational fishers. The season opened October 1 and closed November 30. A bag limit of one salmon per day and no more than four in seven days was in effect. We did not sample this recreational fishery, but concentrated on commercial landings. The sport catch was minimal.

October Fishery off of Brookings: The Oregon Fish and Wildlife Commission set a state waters (0-3 miles) season for all-salmon-except-coho off of Brookings between Goat Island and the latitude of 42°01'20" N. The season was open October 5 through 13 without a chinook quota. A bag limit of one salmon per day and no more than four in seven days was in effect.

EFFORT AND CATCH STATISTICS

Effort

Before 1979, ocean recreational effort data included a small number of bottomfishing trips. Since 1979, salmon fishing trips have been separated from bottomfishing trips. Usually

ocean anglers choose salmon fishing over bottomfishing when both fisheries are available. However this is not the case for ports from Coos Bay north where recent chinook-only seasons have generated only mild interest in the fishing community, and bottomfishing trips tend to predominate throughout the season in most areas.

The sharp drop in effort caused by limited salmon seasons in recent years has not been buffered by a comparable increase in bottomfishing effort. A total of 67,500 bottomfishing trips were taken in 1996, a 4% decrease from the 70,400 trips in the 1995 season. The total combined 1996 salmon and bottomfishing effort of 109,810 angler trips was up 4% from the 105,200 trips in 1995, but remained 56% below the 1971-95 average of 249,399 angler trips. (Table 7).

In 1996, 43,962 trips (40%) targeted salmon coastwide, and 67,534 (60%) trips fished for bottomfish during the salmon season for a total of 109,810 angler trips (Note: the sum of the salmon and bottomfish trips does not equal the total due to a small number of combination charter trips). Salmon angler trips in 1996 were up 23% over 1995's trip total, but were 79% below the 1979-95 average.

August was the peak month for salmon effort with 13,936 salmon angler trips or 32% of the total. August was also the top month for bottomfishing effort with 19,444 trips or 29% of the total (Table 8, Figures 9 and 11, and Appendix Table 10). Historically, July has the highest effort for salmon, especially from Depoe Bay south, while August is often the top month for the Tillamook and Astoria areas. Variable closure periods and reduced fishing seasons have obscured this trend in recent years (Appendix Table 11).

Total effort increased from 1995 levels in all ports except Astoria and Pacific City which decreased and Newport and Brookings which stayed the same. Brookings had the highest salmon fishing effort in 1996 with 23,342 angler trips or 53% of the state's total. The Garibaldi and Astoria areas followed with 8,641 and 5,278 angler trips, respectively (Figure 11). It should be noted that 3,255 (62%) of Garibaldi angler trips occurred during the fall state waters fishery. This is a special fishery that typically was not sampled or included in the data prior to 1994.

Newport had the highest bottomfishing effort with 20,712 trips. Depoe Bay, Garibaldi, and Brookings followed with 16,292, 11,612 and 10,101 bottomfishing trips each, respectively (Table 8). Appendix Table 11 shows past ocean recreational effort and catch by catch areas. Please note that "port" and "catch areas" are not synonymous.

Catch

As with effort, catches were strongly influenced by reduced quotas and restrictive time and area seasons. The sport sampling survey estimated Oregon's 1996 ocean salmon catch by species, except for minor landings from some unsurveyed ports and time periods. Fish landed at minor ports historically have represented less than two percent of the total catch.

Month of Effort

Figure 11. Oregon ocean recreational salmon angler trips by catch area and by month, 1994-96.

Chinook: The 1996 Oregon ocean recreational chinook salmon catch was estimated at 11,210 fish, 66% higher than the 1995 landings. Catches continue to be well below the record catch of 79,300 fish taken in 1976 and the 1979-95 average of 25,300 chinook (Table 7 and Figure 12). Brookings predominated in all months except September, especially in June and August with season total landings of 8,200 chinook or 73% of the coastwide total (Table 9 and Figure 13). Historical catch patterns are shown in Appendix Tables 12, 13, and 14.

Coho: The recreational harvest of 7,176 coho in 1996 represents the lowest annual landing on record, excluding 1994 when coho fishing was prohibited. While this landing is the lowest on record, only the Columbia River catch area was open to recreational coho angling in 1996. Catches in this area accounted for 7,035 (98%) of the total coho landings. Some of these fish (220) were caught in the Columbia River catch area and landed back into Garibaldi. The remaining 141 coho that were landed in 1996 were illegal catches (Figure 15, Table 10, and Appendix Table 15).

Coho

Figure 15. Oregon ocean recreational coho catch by catch area and by month, 1994-96.

CHARTER/PRIVATE BOAT FISHERIES

Background

Approximately 102 charter boats actively participated in Oregon ocean fisheries in 1996, compared to 93 vessels in 1995. Exact estimates of active vessels is difficult due to no logbook requirements and the fact that not all licensed vessels actively participate in the fishery. Some "river guides" also participate in the ocean fishery, but are not included in the charter boat estimates. Since 1983, we have monitored charter boat participation in Oregon. Active vessels have ranged from 158 boats in 1988 to 81 boats in 1994 (Appendix Table 17). Salmon is the primary pursuit in all ports when coho are allowed to be retained, but bottomfishing is also important to charter fleets and has become their primary target in recent years.

No estimate is available on the number of individual private boats that fished in the ocean. Estimates of total boat trips are calculated for private boats, but the number of individual vessels that fished is unknown.

Charter angler effort: The 1996 charter boat effort was estimated at 5,631 salmon angler trips, up 22% from 1995 effort levels, but only 13% of the 1979-95 average of 44,300 angler trips. Charter anglers made up 13% of the total ocean salmon trips in 1996 similar to that seen in 1995 and the 1979-95 average of 22%. When bottomfishing trips are added in; charters in 1996 accounted for 44% of the total angler trips compared to 40% in 1995 (Tables 11 and 12, and Figure 16).

Charter boats operate at most major Oregon ports, but boat and fleet sizes vary. Astoria with 25 boats fished almost exclusively for salmon, and led the coast with 1,723 salmon angler trips. Newport, with the largest charter fleet on the coast of 34 boats, had the second highest bottomfishing effort of any port with 14,235 bottomfish angler trips. Depoe Bay (20 boats) had the highest bottomfishing effort with 14,380 bottomfish angler trips. Garibaldi (14 boats) ranked third with 8,108 bottomfish angler trips.

Restrictions on salmon fishing again in 1995 resulted in a high percentage of charter anglers that went bottomfishing. Eighty-eight percent or 42,877 charter anglers coastwide targeted on bottomfish during the salmon season. The comparable value for 1995 was 89%. An additional 1,686 angler trips were taken on combination trips that fished for both salmon and bottomfish. The high interest in bottomfishing reflected both the tight restrictions on salmon fishing and an increasing interest in halibut fishing. It is important to remember that some additional bottomfishing effort takes place before and after the salmon season, and is not estimated by this report.

Charter angler catch: The catch of 4,142 salmon by charter anglers was a slight decrease from the 1995 catch of 4,376 salmon. This primarily reflects a decrease in effort and catch rates in the open coho season north of Cape Falcon. The charter fleet landed 23% of the total recreational salmon catch in 1996, similar to that seen in 1995, but below the 1979-95 average of 29% (Tables 11 and 12, and Figure 16).

Table 11. Oregon ocean recreational salmon effort and catch by boat type, 1996.

^a Trip types are separated by trips that target salmon, bottomfish, or combination trips. For private boats, combination trips are included as salmon trips.

^b Includes: coho, chinook, and pink salmon.

^c Bottomfish includes: rockfish, lingcod, flatfish, and all other marine finfish species.

Angler Trips (thousands)

Salmon (thousands)

Figure 16. A comparison of effort and catch by Oregon ocean salmon charter and private anglers, 1973-96.

The Astoria charter fleet took 2,875 fish or 69% of the charter caught salmon. Newport charters took 413 salmon or 10%; Brookings caught 378 salmon or 9%; and Garibaldi charters took 332 salmon or 8%. Salmon per angler averages ranged from 1.67 in Astoria to 0.20 salmon per angler in Depoe Bay. In 1996 the state-wide charter average of 0.74 salmon/angler was down from the 1995 level of 0.95 salmon/angler.

Private boat angler effort: The 1996 salmon effort from private boats was estimated at 38,331 angler trips or 87% of the total salmon effort the same as that observed in 1995, but still 76% below the 1979-95 average of 157,514 angler trips (Tables 11, 12, and Figure 16).

Brookings and Garibaldi recorded the most private boat effort for salmon in 1996. Brookings had 22,711 salmon angler trips or 59% of the private boat total, followed by Garibaldi with 7,633 trips (20%).

Some private boats fish only for bottomfish even during the salmon season. Trip type (salmon or bottomfish) ratios were calculated from angler interviews, and applied to the total effort. In years with full salmon seasons, that figure has been less than 10%. In the 1996 season; 22,971 angler trips or 37% of the private trips targeted on bottomfish, compared to 31,854 angler trips or 50% in 1995. Brookings had the most private bottomfish anglers with 7,751; followed by Newport with 5,452; and Coos Bay with 3,406 angler trips.

Private boat angler catch: Anglers from private boats landed 10,059 chinook and 4,185 coho in 1996. The total catch of 14,244 salmon was slightly less than the 1995 catch but only 10% of the 1979-95 average of 139,080 fish. Private boat anglers caught 77% of the total recreational salmon landed in 1996 the same as in 1995, and higher than the 1979-95 average of 71% (Appendix Table 18 and Figure 16).

Brookings private boat anglers averaged 0.35 salmon per angler and landed 7,925 salmon (56%) of the total private boat angler catch. Astoria private boat anglers had landings of 3,968 salmon with an average success rate of 1.12 salmon per angler. These two ports accounted for 83% of the total private boat salmon angler catch. The coastwide angler success rate was 0.37 salmon per angler, compared to 0.46 in 1995 and the 1979-95 average of 0.88 salmon per angler.

ESTIMATES OF RELEASED SALMON

Background

The number of salmon released ("shakers") in the recreational fishery is estimated each year from interview data collected during the ocean sampling survey. This data is variable and depends on anglers correctly recalling the number and species of salmon released and varies with the cooperation and expertise of the angler. This information, while not

exact, is valuable to assess trends in released fish by time and catch area. This data is not used in active management, but is a rough estimate that can help evaluate shaker mortality and fishing regulations (Tables 13, 14, and Appendix Table 22).

Chinook

Most chinook (78%) were retained by anglers during the 1996 season. An exception to this trend occurred to the north of Cape Falcon (Columbia River Management Area) where anglers released 97% of the chinook caught, because the take of chinook was prohibited in this area in 1996. In most ports, the rate of released chinook per retained chinook peaked in September and coincides with the annual recruitment of age two chinook to the fishery (Table 13). Brookings with the highest chinook fishing effort and catch, also had the most released chinook with 1,893 (61%).

Coho

Since coho were prohibited in all areas south of Cape Falcon, release rates on coho exceeded 90% in almost all port and month strata (Table 14). In the Columbia River Area, an average of 10% of the coho caught were released. Brookings had the most released coho with 2,303 (48% of all released coho). August accounted for 54% of the released coho statewide, and August made up 93% of the coho released at Newport.

RECREATIONAL OCEAN SALMON CODED WIRE TAG SAMPLING

Recreational samplers from the OSMP working at nine Oregon coastal ports examined 35% of the chinook and 38% of the coho landed for fin clips indicating the presence of a coded wire tag during the 1996 ocean recreational season.

Chinook

Samplers examined 3,884 of the 11,210 chinook landed in 1996, and found 155 (4.0%) that had adipose fin clips (Table 15). Department staff found readable tags in 129 of the 155 chinook heads for an 83% recovery rate. Most of the observed CWTs were released by California Dept. of Fish and Game (46%); ODFW (38%), and the U.S. Fish and Wildlife Service (9%). By basin, most of the tagged fish were released in California's Sacramento/San Joaquin Basin (46%) and Oregon's Coastal streams (33%) (Figure 17).

Coho

Samplers examined 2,709 of the 7,176 coho landed in 1996, and found 117 (4.3%) that had adipose fin clips. Staff found readable tags in 106 of the 118 coho heads for a 90% recovery rate. Most of the observed CWTs were released by Washington Dept. of Fish and Wildlife (55%) and ODFW (27%) (Figure 17). Most of the tagged fish were from the Columbia Basin (41%) and Washington coastal streams (27%) (Figure 17).

SPECIAL FISHERIES AND STUDIES

Columbia River Buoy 10 Estuary Fishery

The Columbia River estuary opened upstream from Buoy 10 on August 1 for salmon fishing seven days a week, without quotas or a weekly bag limit. This fishery is intended to target surplus Columbia River hatchery coho. The Oregon/Washington combined effort was 25,186 angler trips with a catch of 853 chinook and 5,026 coho (Table 17).

September-November Chinook Fishery off Tillamook Bay

The fall chinook state waters (0-3 miles) recreational fishery off Tillamook Bay was open from Twin Rocks south to Pyramid Rock from August 16 through October 31, 1996. This fishery, commonly referred to as the "Tillamook bubble", targets fall chinook returning to tributary streams of Tillamook Bay, and coincides with the very popular and larger fishery that takes place within Tillamook Bay and its tributaries. Most anglers fish within a mile of the jetties, and many troll back and forth over the bar.

A total of 3,255 angler trips were taken in the 1996 Tillamook state waters fishery (Table 18). Effort dropped off substantially in mid-October due to rough weather, but picked up again during the last week of October.

Table 18. Summary of Oregon ocean recreational terminal ocean fisheries by boat type, 1996.

Anglers landed a total of 733 chinook in the Tillamook bubble, with 617 chinook (84%) caught in the first two weeks of October. One illegal coho was landed by anglers fishing the bubble, and another 34 coho were reported released by anglers (Table 18). Angler success averaged 0.23 chinook per angler, as compared to the 0.15 chinook per angler average from the bay fishery (Table 19).

Fourteen readable CWTs were recovered from the sixteen fin-clipped chinook observed in this season, all from Oregon stocks. Eleven tags were from local Trask River releases, two were from Salmon River, and one was from the Nestucca River.

Tillamook Bay Fall Creel

Beginning in 1994, the OSMP has conducted an intensive statistical creel survey in Tillamook Bay. The fall creel project began on September 2 and continued through the end of October. The bay fishery is divided into three sampling/fishing zones: The lower bay zone (mouth of Tillamook Bay upstream to the Garibaldi boat basin entrance), the mid bay zone (Garibaldi boat basin entrance upstream to the Bay City flats), and the upper bay zone (Bay City flats to the confluence of the Trask and Tillamook Rivers) (Figure 18). The creel is designed to estimate the amount of angling effort, salmon

^a Refer to Figure 18 for fishery zone designations.

Figure 18. Tillamook Bay, Oregon showing the boundaries for the bay zones used in the 1996 recreational creel survey, and areas of primary and secondary fishing activity.

catch by species, angler success rates, and the number of salmon released by species; recover CWTs; and examine the relationship between different types and sizes of baits and lures and the salmon caught with them. This creel only estimates catch by boat anglers in Tillamook Bay, and does not provide estimates of effort or catch by either bank anglers (a minor component in the bay) or river trips upstream from the estuary study area (Figure 18).

Boat counts were made for each area at two hour intervals, stratified by weekday and weekend categories, and Area Under the Curve (AUC) methodology was used to calculate boat hours by area each week. Boat hours were then converted to boat trips by dividing the boat hours for each area by the average hours fished per boat in those areas. The 1996 effort totaled 28,429 angler trips. Effort was split relatively evenly throughout the three areas, although the lower bay zone did have the highest level of effort and accounted for 39% of the angler trips. Effort peaked during the first two weeks of October (Table 19).

Catches in the bay totaled 4,174 chinook and 17 coho (illegal). An additional 68 chinook and 201 coho were reported released by anglers. The lower bay accounted for 35% of the chinook catch but had the lowest average catch rate at 0.13 chinook per angler trip. The mid bay area accounted for 32% of the chinook catch with a catch rate of 0.14 chinook per angler trip.

Oregon Coastal Natural (OCN) coho numbers have dropped coastwide to very depressed levels in recent years. The OCN coho in the Tillamook system have shown an even greater decline, and angling regulations have been adopted to lower harvest related impacts. In addition to wild OCN coho returning to the Tillamook system. The Trask River hatchery also releases coho into the Tillamook Bay system. Hatchery coho are intercepted along with the OCN coho in the bay. Coho interception rates were highest in the lower bay and upper bay areas at an average of 0.010 coho per angler, and lowest in the mid bay area with 0.004 coho per angler.

October-November Fishery off Port Orford

We did not sample the recreational portion of this fishery in 1996 but concentrated on the commercial landings. The sport catch in this fishery has been nonexistent or minimal (<50 fish) in all years.

October Fishery off Brookings

The fall state waters (0-3 miles) recreational fishery off Brookings is designed to target on fall chinook returning to the Chetco River. This fishery extended from Goat Island south to the latitude of 42° 01' 20" N. The season was open from Oct. 5 through Oct. 13. Effort for this fishery totaled 4,282 angler trips (Table 18). Private boats made up 98% of the total effort for this fishery. The chinook catch totaled 1,281 fish. Angler success averaged 0.30 chinook per angler. Eleven coho were illegally kept while 337 were released. An average

ratio of 0.08 coho per angler was observed during the season. Twenty readable chinook CWT's were recovered in this fishery. These tags were from the Chetco River (9), Hunter Creek (4), Pistol River (4), Winchuck River (1), Klamath River (1), and Elk River (1). One coho illegally retained was adipose clipped in this fishery and it was a Rogue River release.

ACKNOWLEDGMENTS

Almost everyone in the Ocean Salmon Management Program at one time or another provided assistance to the ocean sampling program. However, we especially appreciate the help of sampling coordinators Cheryl Roosendaal and Erick Van Dyke and all seasonal samplers. Special recognition is due the Data Management Project Leader Phil Flanders, Administrative Specialist Donna Lamb, and Justine Benson for their help in processing the data, training, and general assistance throughout the year.

	<u>Elk & Chetco River areas</u> 11/1-30	All except coho	Chin. 26". State waters only.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1981 <u>North of Cape Falcon</u> 5/1-31	All except coho	Chin. 28", barbless hooks, except on whole bait or plugs.
7/15 - 8/21	All salmon	Chin. 28"; coho 16".
8/22-24	All salmon	Chin. 28"; coho 16". State waters only.
<u>South of Cape Falcon</u> 5/1-31	All except coho	Chin. 26"; barbless hooks, except on whole bait or plugs.
7/1 - 8/21	All salmon	Chin. 26"; coho 16".
8/22-24	All salmon	Chin. 26"; coho 16". State waters only.
<u>C. Falcon to Cape Sebastian</u> 8/22-24	All except coho	Chin. 26"; whole bait, or plugs 5" or larger.
8/25 - 9/8	All except coho	Chin. 26"; whole bait, or plugs 5" or larger. State waters only.
<u>South of Cape Falcon</u> 9/9 - 10/31	All except coho	Chin. 26".
<u>Elk & Chetco River areas</u> 11/1-30	All except coho	Chin. 26". State waters only.
1982 <u>North of Cape Falcon</u> 5/1-31	All except coho	Chin. 28"; barbless hooks, except on whole bait or plugs.
7/1-8	All salmon	Chin. 28"; coho 16".
<u>South of Cape Falcon</u> 5/1-31	All except coho	Chin. 26"; barbless hooks, except on whole bait.
6/1-15	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
7/1-12	All salmon	Chin. 26"; coho 16".
7/13 - 9/5	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
9/6 - 10/31	All except coho	Chin. 26"; barbless hooks, except on whole bait or plugs.
<u>South of Cape Blanco</u> 5/1 - 6/8	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
<u>Elk & Chetco River areas</u> 11/1-30	All except coho	Chin. 26". State waters only.
1983 <u>North of Cape Falcon</u> 5/1-31	All except coho	Chin. 28"; barbless hooks, except on plugs not less than 5".
7/1-31	All salmon	Chin. 28"; coho, 16"; only plugs not less than 6". Must land 2 chin. for each coho retained.
<u>Columbia River S. Jetty to Cape Falcon</u> 8/10 - 9/8	All salmon	Chin. 28"; coho 16"; open out to 10 miles only.
<u>Cape Falcon to Cape Blanco</u> 5/1-31	All except coho	Chin. 26"; barbless hooks, except on whole bait or plugs (not less than 5").
6/1-15	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
9/5 - 10/31	All except coho	Chin. 26".
<u>Cape Falcon to Cape Kiwanda</u> 8/1 - 9/4	All salmon	Chin. 26"; coho 16".
<u>Cape Kiwanda to Heceta Head</u> 7/1-25; 8/1 - 9/4	All salmon	Chin. 26"; coho 16".
<u>Cape Perpetua to Cape Blanco</u> 7/26-31	All except coho	Chin. 26"; whole bait or plugs not less than 5".

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1983 (cont.)		
<u>Heceta Head to Cape Blanco</u> 7/1-25	All	Chin. 26", coho 16".
8/1 - 9/9	All except coho	Chin. 26"; whole bait, or plugs not less than 5".
<u>Cape Blanco to OR/CA border</u> 5/16-31	All except coho	Chin. 26"; barbless hooks only, not more than 6 troll lines.
6/1-15	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
7/1-25	All salmon	Chin. 26", coho 16".
7/26 - 8/31	All except coho	Chin. 26"; whole bait, or plugs not less than 5" long.
9/1-15	All except coho	Chin. 26". Open area is 12 x 24 mile rectangle around mouth of Rogue River.
10/1-31	All except coho	Chin. 26".
<u>Cape Blanco to Humbug Mtn.</u> 11/1-30	All except coho	Chin. 26". State waters only.
1984		
<u>North of Cape Falcon</u> 5/1-7	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
<u>Columbia River S. Jetty to Cape Falcon</u> 8/4-6	All salmon	Chin. 28"; coho 16"; barbless hooks.
<u>Cape Falcon to Cape Blanco</u> 5/1 - 6/15; 7/1 - 8/31	All except coho	Chin. 26"; barbless hooks.
9/1-21	All except coho	Chin. 26"; state waters only. Contravention of fed. regulation.
<u>Manhattan Beach to Pyramid Rock (Tillamook)</u> 10/1-31	All except coho	Chin. 26"; barbless hooks. State waters only.
<u>Cape Blanco to OR/CA border</u> 5/16 - 6/6; 7/16 - 8/22	All except coho	Chin. 26"; barbless hooks.
<u>Cape Blanco to Humbug Mtn.</u> 10/1 - 11/30	All except coho	Chin. 26"; state waters only; barbless hooks.
1985		
<u>North of Cape Falcon</u> 5/1-14; 5/21-31	All except coho	Chin. 28"; barbless hooks, except on whole bait or plugs. Columbia River Mouth Conservation Zone closed.
<u>Columbia River S. Jetty to Cape Falcon</u> 8/21	All salmon	Chin. 28"; coho 16"; barbless hooks, except on whole bait or plugs.
<u>Cape Falcon to Cape Blanco</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks, except on whole bait or plugs.
7/1-26	All salmon	Chin. 26", coho 16"; barbless hooks. One more coho than chinook may be kept, provided at least 1 chinook is kept.
7/27 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Tower Rock to Cape Blanco</u> 11/1-30	All except coho	Chin. 26"; barbless hooks. State waters only.
<u>Cape Blanco to Humbug Mtn.</u> 10/1 - 11/30	All except coho	Chin. 26"; barbless hooks. State waters only.
1986		
<u>North of Cape Falcon</u> 5/1-10; 5/14-17; 5/24-27; 5/30-31	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
8/2-3; 8/7-9	All salmon	Chin. 28"; Coho 16". Barbless hooks.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1986 (cont.)		
<u>Cape Falcon to Cape Perpetua</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks.
7/1-20; 7/23-24	All salmon	Chin. 26"; coho 16"; barbless hooks. Single daily landing or possession of up to 50 coho. No additional coho can be landed or possessed unless chinook are also landed at a ratio of at least 1 chinook for every 2 coho.
7/25 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Twin Rocks to Pyramid Rock</u> <u>(Tillamook)</u> 11/1-15	All except coho	Chin. 26"; barbless hooks. State waters only.
<u>Cape Perpetua to Cape Blanco</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks.
7/1-20	All salmon	Chin. 26"; Coho 16"; barbless hooks. No coho could be landed without landing chinook at a ratio of at least 1 chinook for each 2 coho.
7/23-24	All salmon	Same regulations as in Cape Falcon to Cape Perpetua (for 7/1-24 see above).
7/25 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Sisters Rocks to Chetco Point</u> 5/1 - 6/6	All except coho	Chin. 26"; barbless hooks. Open only within 6 nautical miles of shore.
<u>Cape Blanco to OR/CA border</u> 6/16-19; 6/23-26 6/30 - 7/5; 7/17-24	All salmon	Chin. 26"; Coho 22"; barbless hooks. At least one chinook must be possessed or landed for each 2 coho possessed or landed.
7/25 - 8/26	All except coho	Chin. 26"; barbless hooks.
<u>Sisters Rock to Mack Arch</u> 8/29	All except coho	Chin. 26"; barbless hooks. Open only within 6 nautical miles of shore.
<u>Cape Blanco to Humbug Mtn.</u> 10/1 - 11/26	All except coho	Chin. 26"; barbless hooks. State waters only.
1987		
<u>North of Cape Falcon</u> 5/1-10; 5/14-15	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed. Chinook harvested in this fishery must be landed north of Cape Falcon unless reported to the U.S. Coast Guard.
7/25-26	All salmon	Chin. 28"; coho 16"; barbless hooks. Landing restrictions as above. Columbia River Mouth Conservation Zone closed; nearshore area closure 0 to 3 miles from Tillamook Head to Red Buoy Line and 0 to 10 miles between Red Buoy Line and Queets River.
<u>Cape Falcon to Cape Perpetua</u> 5/1 - 7/14	All except coho	Chin. 26"; barbless hooks.
7/15-28; 8/1-28	All salmon	Chin. 26"; coho 16"; barbless hooks. Single daily possession or landing of up to 100 coho/vessel. At least 1 chinook required for each 2 coho over 100.
<u>Cape Falcon to Cape Blanco</u> 8/29 - 9/15	All salmon	Chin. 26"; coho 16"; barbless hooks. 200 coho may be possessed or landed without chinook restrictions. Over 200 coho, at least 1 chinook must be possessed or landed for each 2 coho possessed or landed.
9/16 - 10/31	All except coho	Chin. 26"; barbless hooks. All commercial salmon fishing closed 9/16-18 from Cape Arago to Cape Blanco.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1987 (cont.) <u>Cape Perpetua to Cape Blanco</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks.
7/1-28; 8/1-28	All salmon	Chin. 26"; coho, 16"; barbless hooks. At least 1 chinook must be possessed or landed for each 2 coho possessed or landed except that 1 coho may be possessed or landed without having a chinook.
<u>Sisters Rocks to Chetco Point</u> 5/1-14	All except coho	Chin. 26"; barbless hooks.
<u>Cape Blanco to OR/CA border</u> 6/1-3; 6/7-10; 6/14-25	All salmon	Chin. 26"; coho 22"; barbless hooks. At least 1 chinook must be possessed or landed for each 1 coho except that 1 coho may be possessed or landed without having a chinook.
<u>Cape Blanco to Humbug Mtn.</u> 10/1 - 11/30	All except coho	Chin. 26"; barbless hooks. State waters fishery.
1988 <u>North of Cape Falcon</u> 5/1 - 6/14	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
<u>Cape Falcon to Orford Reef Red Buoy</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks.
<u>Cape Falcon to Cascade Head</u> 7/1 - 8/19	All salmon	Chin. 26"; coho 16"; barbless hooks. From 7/1-13 mixed loads of chinook and coho or coho only loads could not be landed between Cascade Head and Cape Arago unless the load met the possession and landing ratios for that area.
8/20 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cascade Head to Cape Arago</u> 7/1-13	All salmon	Chin. 26"; coho 16"; barbless hooks. At least 1 chinook must be possessed or landed for each 2 coho possessed or landed except there was a single daily possession or landing per vessel of 2 coho w/o the ratio requirement. Mixed loads of chinook and coho or coho only loads must be delivered in the sub-area.
7/16 - 8/19	All salmon	As above but no ratio requirement.
8/20 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cape Arago to Orford Reef Red Buoy</u> 7/16 - 8/19	All salmon	Chin. 26"; coho 16"; barbless hooks. No ratio requirement.
8/20-31; 9/16 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Sisters Rocks to Chetco Point</u> 5/1-4	All except coho	Chin. 26"; barbless hooks. From shore out to 6 miles only.
<u>Humbug Mtn. to Punta Gorda</u> 6/5-7	All salmon	Chin. 26"; coho 22"; barbless hooks. Sun. through Wed. only.
<u>Sisters Rocks to Mack Arch</u> 9/1-14	All except coho	Chin. 26"; barbless hooks.
<u>Orford Reef Red Buoy to Humbug Mountain</u> 10/1-31	All except coho	Chin. 26"; barbless hooks. State waters only.
<u>Cape Blanco to Humbug Mtn.</u> 11/1-30	All except coho	As above.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1989 <u>North of Cape Falcon</u> 5/1 - 6/8; 6/13-15	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
8/21; 8/24 - 9/10	All salmon	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. Open south of Columbia River 8/21; and extended north to Leadbetter Point from 8/24. Daily landing limit of 40 coho and 4 chinook in effect through 8/27; daily landing of 40 coho and 8 chinook from 8/28 through 9/10. All salmon must be landed within this area.
<u>Cape Falcon to Cascade Head</u> 5/1 - 7/11; 8/18 - 10/31	All except coho	Chin. 26"; barbless hooks.
7/12-14	All salmon	Chin. 26"; coho 16"; barbless hooks. Mixed loads of coho and chinook, or coho only must be landed in this area.
7/18 - 8/17	All salmon	Chin. 26"; coho 16"; barbless hooks. A daily landing limit of 50 coho through 8/13; from 8/14 through 17 at least 1 chinook must be possessed or landed for each 2 coho possessed or landed; except that if no chinook were possessed, a single daily landing of 2 coho was permitted. Mixed loads of coho and chinook, or coho only must be landed in this area.
<u>Cascade Head to Orford Reef Red Buoy</u> 5/1 - 6/23; 8/18 - 10/31	All except coho	Chin. 26"; barbless hooks. The subarea from Cape Arago to Port Orford Reef Red Buoy was closed 8/18 - 31.
7/1-14	All salmon	Chin. 26"; coho 16"; barbless hooks. A daily landing limit of 50 coho, plus 3 coho for each chinook landed. Mixed loads of chinook and coho, or coho only must be landed in this area. All chinook must be delivered with the coho.
7/18 - 8/17	All salmon	Chin. 26"; coho 16"; barbless hooks. At least 1 chinook must be landed for each 2 coho, except that a single daily landing of 2 coho without any chinook is permitted. Mixed loads of coho & chinook, or coho only loads must be landed in this area. All chinook must be delivered with the coho.
<u>Orford Reef Red Buoy to Humbug Mountain</u> 10/1-31	All except coho	Chin. 26"; barbless hooks. State waters only.
<u>Cape Blanco to Humbug Mountain</u> 11/1-30	All except coho	As above.
<u>Sisters Rocks to House Rock</u> 5/1-2	All except coho	Chin. 26"; barbless hooks. Open from 0-6 nautical miles only.
<u>Sisters Rocks to Mack Arch</u> 9/1-14	All except coho	As above.
<u>Humbug Mountain to OR/CA Border</u> 6/5-8	All salmon	Chin. 26"; coho 22"; barbless hooks. A single daily landing of 20 chinook per day. All salmon must be delivered in this area.
8/18-20; 8/22-31	All except coho	As above.
1990 <u>US-Canada Border to Cape Falcon</u> 5/1-14; 5/18-27; 5/31 - 6/2; 6/8-11; 6/14	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
8/18-21; 8/25-26	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. Open period restriction of 20 chinook & 200 coho per vessel. All fish must be landed and delivered in the area.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1990 (cont.) <u>Leadbetter Point to Cape Falcon</u> 8/30 - 9/14; 9/18-19; 9/22 - 10/15	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. Single daily landing of 50 coho, with one additional coho for each chinook landed. From 9/22 - 10/15 daily landing increased to 100 coho. All salmon must be landed in the area.
<u>Cape Falcon to Humbug Mtn.</u> 5/1 - 6/25; 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cape Falcon to Cascade Head</u> 7/4-15	All except coho	Chin. 26"; barbless hooks.
7/16 - 8/31	All	Chin. 26"; coho 16"; barbless hooks. Single daily landing of 50 coho plus 1 coho for each chinook. All coho must be landed in area or in adjacent closed areas.
<u>Cascade Head to Humbug Mtn.</u> 7/4-31 (Cape Arago to Humbug Mtn. closed 7/10-17 & 7/24-31)	All	Chin. 26"; coho 16"; barbless hooks. At least one chinook must be landed for each coho, except a landing of 1 coho and no chinook is permitted. Loads with coho must be delivered in this area.
8/1-31 (Cape Arago to Humbug Mtn. closed 8/7-14)	All except coho	Chin. 26"; barbless hooks.
<u>Sisters Rocks to House Rock</u> 5/1-24	All except coho	Chin. 26"; barbless hooks. Open 0-6 miles from shore. All salmon must be landed in this area.
<u>Sisters Rocks to Punta Gorda</u> 8/1-6; 8/8-31	All except coho	Chin. 26"; barbless hooks. All salmon must be landed in this area.
<u>Sisters Rocks to Mack Arch</u> 9/3-16	All except coho	Chin. 26"; barbless hooks. All salmon must be landed in this area.
<u>43°30'00"N to Cape Arago</u> 11/1-14.	All	Chin. 26"; coho 16"; barbless hooks. Open 0-3 miles from shore. Experimental fishery 10 vessels selected through drawing. All salmon must be landed into Coos Bay.
1991 <u>US-Canada Border to Cape Falcon</u> 5/1 - 6/15	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
<u>Leadbetter Point to Cape Falcon</u> 8/10-11	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. Open period landing restriction of 100 coho per vessel.
<u>Copalis Head to Cape Falcon</u> 9/1-2	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. Open period landing restriction of 75 coho per vessel. All salmon must be landed North of Cape Falcon.
<u>Cape Falcon to Cascade Head</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
7/1-14	All	Chin. 26"; coho 16"; barbless hooks.
7/15-23; 8/1 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cascade Head to Florence S. Jetty</u> 5/1 - 6/23	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
6/24 - 7/11	All	Chin. 26"; coho 16"; barbless hooks.
7/12-23; 8/1 - 10/31	All except coho	Chin. 26"; barbless hooks.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1991 (cont.)		
<u>Florence S. Jetty to Cape Arago</u> 6/24 - 7/11	All	Chin. 26"; coho 16"; barbless hooks.
7/12-14; Aug. 1-9	All except coho	Chin. 26"; barbless hooks.
<u>Florence S. Jetty to Humbug Mtn.</u> 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Sisters Rocks to Mack Arch</u> 9/1-15	All except coho	Chin. 26"; barbless hooks. Open 0-6 miles from shore. All salmon must be landed in this area.
1992		
<u>US-Canada Border to Cape Falcon</u> 5/1 - 6/15	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Conservation Zone closed.
7/20-21	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. No more than 4 spreads per line, 6 inch or larger plugs only. Open period landing restriction of 30 coho per vessel. All salmon must be delivered in this area or adjacent closed areas within 24 hours of closure.
7/25-27; 7/31 - 8/2; 8/6-8; 8/12-14; 8/20-22	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Conservation Zone closed. No more than 4 spreads per line, 6 inch or larger plugs only. Open period landing restriction of 44 coho per vessel. All salmon must be delivered in this area or adjacent closed areas within 24 hours of each closure.
<u>Cape Falcon to Florence S. Jetty</u> 5/1-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
<u>Cape Falcon to Cascade Head</u> 7/22 - 8/21	All	Chin. 26"; coho 16"; barbless hooks. At least one chinook must be landed for each two coho. All loads with coho must be delivered in this area or in adjacent closed areas north of Cascade Head.
8/22-31	All	Chin. 26"; coho 16"; barbless hooks. Single daily landing limit of 25 coho plus 2 coho for each chinook. All loads with coho must be delivered in this area or in adjacent closed areas north of Cascade Head.
9/1 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cascade Head to Florence S. Jetty</u> 7/22 - 8/7	All	Chin. 26"; coho 16"; barbless hooks. At least one chinook must be landed for each two coho. All loads with coho must be delivered in this area or in adjacent closed areas south of Cascade Head.
8/8 - 10/31	All except coho	Chin. 26"; barbless hooks.
<u>Cape Blanco to Humbug Mtn.</u> 10/24-26	All except coho	Chin. 26"; barbless hooks. State waters fishery.
1993		
<u>US-Canada Border to Cape Falcon</u> 5/1 - 6/15	All except coho	Chin. 28"; barbless hooks. Columbia River Mouth Control Zone closed.
7/14-17, 7/21-24 7/28-31, 8/4-6	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Control Zone closed. No more than 4 spreads per line. Gear restricted to plugs and/or whole bait 6 inches or larger. Open period landing restriction at 50 coho per opening. All salmon must be delivered in this area or adjacent closed area within 24 hours of each closure.
<u>Queets River to Cape Falcon</u> 8/27-28	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Control Zone closed. Open period landing restriction of 35 coho per opening. All salmon must be delivered in this area or adjacent closed area within 24 hours of each closure.
9/1-4; 9/9-12; 9/16-19	All	Chin. 28"; coho 16"; barbless hooks. Columbia River Mouth Control Zone closed. Open period landing restriction of 70 coho per opening. All salmon must be delivered in this area or in adjacent closed area within 24 hours of each closure.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1993 (cont.)		
<u>Cape Falcon to Florence S. Jetty</u> 5/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
<u>Florence S. Jetty to Cape Arago</u> 5/1 - 6/30; 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
<u>Cape Arago to Humbug Mtn.</u> 5/1-31; 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per line.
<u>Cape Blanco to Humbug Mtn.</u> 11/1-30	All except coho	Chin. 26"; barbless hooks. State waters fishery.
1994		
<u>Cape Falcon to Humbug Mtn</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Cape Falcon to Cascade Head</u> 10/1-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Twin Rocks to Pyramid Rock</u> 11/1-15	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Cascade Head to Humbug Mtn.</u> 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State
<u>Cape Blanco to Humbug Mtn.</u> 11/1-7	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles).
<u>Sisters Rock to House Rock</u> 5/1-2; 5/5-6; 5/10-11; 5/14-15; 5/18-31.	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. (0-6 miles). All salmon must be landed at Gold Beach, Port Orford, or Brookings within 24 hours of each closure.
<u>Sisters Rock to Mack Arch</u> 8/8-9	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. (0-6 miles). Special registration fishery. Daily landing limit of 20 fish. All salmon must be landed at Gold Beach, Port Orford, or Brookings. Trip length limited to 3 days (72 hours).
8/10-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. (0-6 miles). Special registration fishery. Daily landing limit of 60 fish. All Trip length limited to 3 days (72 hours).
<u>Goat Island to Red Point</u> 10/10-25; 10/30-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles).
1995		
<u>Cape Falcon to Cape Lookout</u> 8/1-31; 10/1-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
9/1-30	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles).
<u>Cape Falcon to Florence South Jetty</u> 8/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. Closed in Control Zone 2 (mouth of Tillamook Bay in August and September). Open only (0-3 miles) north of Cape Lookout in September.
<u>Florence South Jetty to Cape Arago</u> 8/1-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Cape Arago to Humbug Mountain</u> 5/1 - 6/30	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.

Appendix Table 3 (cont). History of actual Oregon ocean commercial troll fishery regulations, 1948-96.

AREA AND SEASON	SPECIES	SIZE, GEAR, AND OTHER RESTRICTIONS
1995 (cont.) <u>Cape Blanco to Humbug Mountain</u> 11/1-7	Chin. only	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles).
<u>Sisters Rock to Mack Arch</u> 7/24-25	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. (0-4 miles). All salmon caught in the area must be delivered in Gold Beach, Port Orford or Brookings within 24 hours of each closure.
<u>Sisters Rock to House Rock</u> 5/1-2; 5/5-6; 5/10-11; 5/14-15; 5/18-31.	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. (0-6 miles). All salmon caught in the area must be delivered in Gold Beach, Port Orford or Brookings within 24 hours of each closure.
<u>Goat Island to 42° 01' 20" N. Lat.</u> 10/10-20	Chin. only	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles). Daily landing limit of 20 chinook.
1996 <u>Cape Falcon to Cape Arago</u> 5/1 - 6/30; 8/7 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. Closed at the mouth of Tillamook Bay June 1 to September 15.
<u>Cape Arago to the OR/CA border</u> 5/1-4; 5/8-11; 5/15 - 6/4	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Cape Arago to Humbug Mtn.</u> 8/7-31 and 9/1 - 10/31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire.
<u>Cape Blanco to Humbug Mtn.</u> 11/1-30	Chin. only	Chin. 26"; barbless hooks. No more than 4 spreads per wire. State waters only (0-3 miles). Landings restricted to Port Orford.
<u>Sisters Rock to Mack Arch</u> 8/3-4; 8/7-8; 8/11-12; 8/15-31	All except coho	Chin. 26"; barbless hooks. No more than 4 spreads per wire. Open from 0-4 miles. All salmon caught in the area must be delivered in Gold Beach, Port Orford or Brookings within 24 hours of each closure. Season to follow a 2 day open/2 day closed cycle. Closed within 1 mile of the Rogue River Mouth.
<u>Goat Island to 42° 01' 20' N. Lat.</u> 10/14-31	Chin. only	Chin. 26"; barbless hooks. No more than 4 soreads per wire. State waters only (0-3 miles). Salmon must be delivered into Brookings. Single day landing limit of 20 chinook.

	Humbug Mtn. to Horse Mtn.	9/1-9	All	1	6	40	20	NA	none	Barbless hooks	Closed to the take of coho
	Goat Island to 42° 01' 20" N. Lat.	10/10-15; 10/21-22	All	1	4	40	20	NA	none	Barbless hooks	Closed to the take of coho
1996	North of Cape Falcon	7/22 - 9/26	Sun-Thurs	2	4	40	NA	16	none	Barbless hooks	Closed to the take of chinook
	Cape Falcon to Humbug Mtn.	5/1 - 7/7; 8/16 - 9/30	All	2	6	40	20	NA	none	Artificial lures, plugs, whole or plug cut bait > 6", (excluding hooks and swivels) no more than 2 single point, single shank barbless hooks. Flashers and divers are prohibited.	Closed to the take of coho

Appendix Table 9 (cont.). Summary of Oregon's recreational ocean salmon regulations, 1946-96.

Year	Open Area	Open Season	Open Days	Catch Limits			Size Limits (inches)			Gear Restrictions	Misc Regulations
				Daily	7 Day	Year	Chin.	Coho	Pink		
1996 (cont.)	Twin Rocks to Pyramid Rock (0-3 miles)	10/1-31	All	2	4	10	20	NA	none	Artificial lures, plugs, whole or plug cut bait > 6", (excluding hooks and swivels) no more than 2 single point, single shank barbless hooks. Flashers and divers are prohibited.	Chinook only (0-3 miles)
	Cape Blanco to Humbug Mtn.	10/1 - 11/30	All	1	4	40	20	NA	none	Barbless hooks	Chinook only (0-3 miles)
	Humbug Mtn. to Horse Mtn.	5/12 - 7/7; 8/18 - 9/21	All	1	4	40	20	NA	none	Barbless hooks	Open to all salmon except coho
	Goat Island to 42° 01' 20" N. Lat.	10/5-13	All	1	4	40	20	NA	none	Barbless hooks	Chinook only (0-3 miles)

a/ CRCZ = Columbia River Conservation Zone. This fishery management area has changed in size during a number of years, but in general has been the area off the Columbia River between North Head, Washington and the red buoy line on the Oregon side. The name was changed to Columbia River Control Zone in 1992.

b/ Gear Restrictions: Artificial plugs or whole bait, both 6" or larger. No more than 2 single shank, single point barbless hooks ; no painted weights or attractors such as flashers or colored divers (uncolored divers are not considered attractors).

^a Columbia River area includes Astoria, Warrenton, and Hammond; Tillamook area includes Garibaldi and Pacific City; Newport area includes Depoe Bay and Newport; Coos Bay area includes Florence, Winchester Bay, and Coos Bay; Brookings area includes Gold Beach and Brookings.

^b By area and calendar month. Season totals may vary from summarized months due to rounding.

^c Only 600 were ocean only trips. Most were combination bay-ocean trips.

Appendix Table 12. Summary of Oregon recreational ocean salmon effort and catch by area, 1976-96.

^a Columbia River area includes Astoria, Warrenton, and Hammond; Tillamook area includes Garibaldi and Pacific City; Newport area includes Depoe Bay and Newport; Coos Bay area includes Florence, Winchester Bay, and Coos Bay; Brookings area includes Gold Beach and Brookings.

^b 1976-1978 effort includes a small number of bottomfishing trips.

^c Preliminary.

^d Represents illegal coho landings.

^a Columbia River area includes Astoria, Warrenton, and Hammond; Tillamook area includes Garibaldi and Pacific City; Newport area includes Depoe Bay and Newport; Coos Bay area includes Florence, Winchester Bay, and Coos Bay; Brookings area includes Gold Beach and Brookings from 1979 through 1987.

^b Individual monthly catches may not equal season total due to rounding. Season totals for individual catch areas for 1974-75 data may not equal the sum of combined months due to some effort/landings not identified by port of landing. "All Areas" summary includes unidentified data.

^c Includes Nehalem Bay.

^d Includes Salmon and Siletz Rivers and Alsea Bay.

^e Catch estimates for the fall state waters fishery off the mouth of Tillamook Bay, are not included for 1983, 1984, 1986-89, or 1991-93.

Appendix Table 14. Oregon ocean recreational chinook catch, by port and statistical week, 1996^a.

^a Refer to Appendix Table 20 for 1996 statistical week calendar.

^b Coho were prohibited in most areas in 1996, these were illegal landings.

^c Coho caught in open season north of Cape Falcon and legally landed into Garibaldi.

^d All but 2 of these coho were legal catches, from north of Cape Falcon.

Appendix Table 21. Oregon coastal freshwater and estuary recreational coho salmon fisheries, 1996. These fisheries represent limited time and area fishing opportunity where the majority of coho are of hatchery origin.

Areas Open for Coho Angling	Open Period
North Fork of the Nehalem River from it's confluence with the mainstem Nehalem River upstream to fourth bridge on Hamlet Road near milepost 6.	Sept. 1 - Nov. 14
The Trask River open for fin-clipped coho from the Hwy. 101 bridge upstream to the confluence of the North and South forks.	Sept. 16 - Oct. 31
Yaquina River mainstem (including tidewater) open for fin-clipped coho downstream from the first bridge on Eddyville-Nashville Road (except closed west of Hwy. 101 through August 15).	Aug. 1 - Dec. 31
The mainstem Umpqua River (including tidewater) downstream from the North Umpqua, and the North Umpqua River open for fin-clipped coho.	Sept. 1 - Dec. 31
Isthmus Slough (Coos Bay) from the mouth upstream to the tidegate.	Entire year
Rogue River -upstream from the Illinois River- open for fin-clipped coho.	Sept. 1 - Dec. 31
Rogue River -downstream from the Illinois River (including tidewater)- open for fin-clipped coho.	Sept. 1 - 30
