

R & E Grant Application 3-5 Biennium

Project #:
03-014

Accessible Dock For Physically Disabled

Project Information

R&E Project Request: \$41,632.98
Match Funding: \$4,800.00
Total Project: \$46,432.98
Start Date: 9/1/2003
End Date: 6/30/2005
Project Email: Joseph.L.Vawter@state.or.us
Project Biennium: 3-5 Biennium
Organization: ODFW - John Day Screens Shop

Applicant Information

Name: Joseph Vawter
Address: West Hwy.26 Patterson Bridge Rd.
John Day, OR 97845
Telephone: 541-575-0561
Fax: 541-575-0868
Email: Joseph.L.Vawter@state.or.us

Past Recommended or Completed Projects

This applicant has no previous projects that match criteria.

Project Summary

This project is NOT part of ODFW's 25 Year Angling Plan.

Activity Type: Access

Summary: Build an accessible fishing dock for the public and enhance the pond so that the potential for a better quality fishing experience.

Objectives: To create a more accessible recreational opportunity by installing a fishing dock and to improve the habitat of the pond.

Fishery Benefits: The John Day basin is designated as a wild fish basin, so trout fishing opportunities are limited for stocked fish to a few outlying lakes and reservoirs. Only one other pond is stocked in John Day and receives a lot of pressure. Enhancing this pond would provide additional opportunity for local residents and the youth of John Day to fish close to home and alleviate some of the pressure off the other pond. Additionally our pond has better potential to over winter fish thus making for a better quality fishing experience.

Watershed Benefits:

Current Situation: This pond was on site when ODFW acquired the property. The pond has since been dedicated as Brandon's Pond in memory of a long time John Day ODFW employee who's son was killed in an auto accident. The pond is open to public fishing and is stocked annually. The fishing opportunities for trout is one of only two that are located in the city of John Day, and is a favorite of the local youth.

Alternatives: no information

Designer: no information

Methods: This fishing dock will be constructed of TREX building material that will not rot, crack or warp and pressure treated materials. The ODFW personnel here in John Day. Will be doing the construction of the fishing dock. We will use 2 carpenters, 1 welder and our construction inspector to oversee the work. We will use the 2 carpenters to frame in the dock and the welder to build a steel frame to hold the dock floats in place and tie into the frame of the dock. One of the carpenters will also be a truck driver for the dump truck and the construction inspector will be the trackhoe operator once the dock work is completed and inspected.

Inspector: no information

Funding Elements: no information

Partners: No

Existing Plan: No

Affected Contacted: No

Affected Supportive: No

Project Schedule/Participants/Funding

This project has no Schedule/Participants/Funding.

Affected Species:
Rainbow Trout

Project Permits

This project has no permits.

Project Monitoring

This project has no monitoring.

Project Maintenance

This project has no maintenance plans.
