Project Summary

This project is part of ODFW's 25 Year Angling Plan.

Activity Type: Hatchery Maintenance - ODFW
Summary: This project will provide siding, windows, doors and painting for a maintenance supply and storage building located at this facility. This building is essential for hatchery operations and will allow for safe dependable use for many years to come.
Objectives: The objective of this proposal is to repair a maintenance building at this facility. Completing this project will eliminate the shedding of lead based paint chips around the building.
Fishery Benefits: The equipment stored in this building is used in fish culture operations, hatchery maintenance and public outreach.
Watershed Benefits:
Current Situation: The building is over 70 years old. The siding, doors & windows are original

and have been poorly maintained. The exterior of the building has patches of dry rot and peeling paint. The window panes are rotten and the glass is loose. The roof & fascia were replaced in 2008. The interior and structure of the building is good.

Alternatives: Restoring the building with hatchery maintenance funds is a preferable option. There are no funds for this project at this time.

Designer: ODFW Engineering.

Methods: This project will be put out to bid according to ODFW engineering specifications.

Inspector: ODFW Engineering.
